

# JOSUÉ ROJAS ARRIETA

Senior QA Specialist | Production Support & Test Strategy Expert

Heredia, Costa Rica | 7.josue@gmail.com | +506 7015-9037 | [linkedin.com/in/josue-rojas](https://www.linkedin.com/in/josue-rojas)

## PROFESSIONAL SUMMARY

Senior QA Specialist with 11+ years of experience in production support, live issue troubleshooting, and quality assurance across healthcare, financial services, insurance, and SaaS platforms. Skilled at diagnosing and resolving production incidents, validating APIs with Postman, performing SQL data validation, and collaborating with cross-functional teams (Engineering, Product, Client Support) to maintain system stability and client satisfaction. Experienced in triaging high-priority defects in live environments, working under tight deadlines, and ensuring regulatory compliance in HIPAA and insurance-regulated systems.

## CORE SKILLS & EXPERTISE

- **Manual Testing:** Functional, Regression, Smoke, Integration, End-to-End, Exploratory, UAT
- **API Testing & Backend Validation:** Postman, REST APIs, response validation, integration testing, mobile workflow validation
- **Database Validation:** SQL queries, MySQL, Snowflake, data integrity verification, troubleshooting data inconsistencies
- **Mobile Testing:** iOS/Android native apps, real devices, emulators, BrowserStack, cross-device validation, usability testing
- **Automation:** Playwright (TypeScript) hands-on test scripts, Maestro (iOS native), Appium concepts, AI-assisted development
- **CI/CD:** GitHub Actions pipeline integration, automated test execution on code pushes, build validation
- **Production Support & Troubleshooting:** Live issue diagnosis, defect reproduction, fix validation, root cause analysis
- **Bug Documentation:** Detailed repro steps, device model, OS version, app version, screenshots and screen recordings
- **Client-Facing Collaboration:** Working with Client Support teams, technical communication, issue triage
- **POS, E-Commerce & Payment Gateway Testing:** Transaction validation, Stripe integration, payment processing, refunds/voids, checkout flows
- **Test Strategy & Process:** TestRail implementation, test case design, QA workflow standardization, Agile/Scrum
- **Domain Expertise:** Healthcare (HIPAA), Life Insurance (underwriting, compliance), SaaS platforms, POS systems, E-Commerce, Genomics
- **Accessibility Testing:** Color contrast validation, keyboard navigation testing, WCAG basic principles
- **Tools:** TestRail, JIRA, Confluence, ServiceNow, Postman, MySQL, Snowflake, AWS, Stripe, BrowserStack, GitHub Actions

## PROFESSIONAL EXPERIENCE

### Senior QA Specialist (Full-time)

Zette | Remote | November 2025 - Present

*Skills: Playwright (TypeScript), Maestro, Appium, Postman, MySQL, TestRail, JIRA, iOS/Android, BrowserStack, GitHub Actions, Stripe*

- Transitioned from long-term freelance contractor to full-time employee after 3+ years of successful collaboration
- Founded and built the entire QA department from scratch, establishing quality standards, test strategies, and release validation processes
- Troubleshoot and resolve production issues in live environments, collaborating with engineering teams to maintain system stability
- Perform rapid triage of client-reported defects, reproducing issues and validating fixes under time-sensitive conditions
- Implement TestRail system company-wide including standards, templates, and comprehensive documentation

- Execute complete manual validation across web and mobile platforms: functional, smoke, regression, end-to-end, and exploratory testing in Agile/sprint cycles
- Perform API testing using Postman to ensure backend data integrity, validate responses, and troubleshoot failed integrations tied to mobile workflows
- Validate POS and e-commerce payment gateway integrations including transaction processing, payment flows, Stripe API integrations, checkout flows, refunds, and voids
- Use SQL queries (MySQL) for backend data validation and troubleshooting data inconsistencies between frontend and database
- Lead mobile testing for iOS/Android on real devices and emulators covering usability, performance, and feature readiness
- Wrote and maintained Playwright (TypeScript) automation scripts for web workflows, leveraging AI-assisted development while maintaining full ownership of test logic
- Built iOS native automation test suites using Maestro covering end-to-end mobile workflows
- Familiar with Appium architecture for cross-platform mobile automation
- Documented bugs with detailed repro steps, device model, OS version, app version, screenshots and screen recordings
- Serve as primary QA point of contact for requirements clarification, priorities, and release readiness decisions

### **Senior QA Contractor (Freelance)**

*Zette | Remote | 2022 - October 2025*

*Skills: iOS/Android, Manual Testing, BrowserStack, JIRA, Maestro*

- Provided ongoing QA services on a project-based contract for multiple mobile applications
- Performed comprehensive manual testing for iOS and Android native applications including usability, performance, and cross-device validation
- Tested mobile-specific features such as push notifications, camera integration, and various OS versions ensuring consistent user experience
- Documented bugs with detailed repro steps, device model, OS version, app version, and screen recordings
- Collaborated with development team on feature releases, bug reports, and production issue resolution
- Maintained recurring engagement across multiple projects while balancing work with other concurrent QA roles
- Built strong working relationship with team that ultimately led to full-time employment offer

### **Senior QA Engineer**

*TotalPerform | Remote | November 2023 - October 2025*

*Skills: Postman, MySQL, SQL, JIRA, TestRail, XML/JSON, Agile/Scrum*

- Validated complex life insurance business workflows ensuring regulatory compliance and accuracy across client applications
- Investigated and resolved production defects reported by clients, reproducing issues and working with developers to validate fixes
- Collaborated closely with Client Support team to diagnose live environment issues and validate resolutions before deployment
- Tested end-to-end form submission processes including case creation workflows and verification of XML/JSON outputs
- Created and maintained comprehensive test cases covering smoke, regression, and production release cycles in Agile/sprint environments
- Performed SQL queries to validate backend data accuracy and troubleshoot data mismatches between systems
- Documented bugs with detailed repro steps, environment details, screenshots, and severity classification
- Applied deep knowledge of life insurance business rules: age-based eligibility, state regulations, rate calculations, policy riders
- Validated customer-facing outputs (offers, PDF illustrations) for accuracy, compliance, and regulatory requirements

### **Mobile Senior QA Freelancer**

*CarePics (Healthcare) | Remote | April 2022 - June 2023*

*Skills: iOS/Android, BrowserStack, JIRA, Postman, WCAG, Manual Testing, HIPAA*

- Led manual QA for HIPAA-compliant healthcare web and mobile applications with focus on clinical workflow accuracy
- Troubleshoot and validated production issues reported by healthcare providers, ensuring quick resolution to minimize clinical impact
- Conducted cross-device and cross-browser validation using BrowserStack across multiple real devices, screen sizes, and OS versions for healthcare professionals and patients
- Designed comprehensive test plans for diagnostic image handling, patient onboarding, and telehealth features
- Validated native Android and iOS mobile applications including camera integration, push notifications, and device compatibility
- Tested responsive design across multiple screen sizes ensuring consistent user experience
- Performed exploratory and regression testing for user permissions, data integrity, and patient-provider interactions
- Documented bugs with device model, OS version, app version, repro steps, and screen recordings
- Performed accessibility testing including color contrast validation and keyboard navigation to ensure WCAG compliance for healthcare users

### Senior Manual QA Engineer

*Gorilla Logic | Remote | March 2021 - April 2022*

*Skills: Postman, MySQL, Stripe, AWS, JIRA, SQL, XML/JSON*

- Specialized in QA for life insurance platforms focusing on agent forms for mortgage-related insurance applications
- Verified structured outputs (XML/JSON) from agent forms ensuring correct data mapping for underwriting
- Conducted comprehensive Point of Sale (POS) and e-commerce testing using Stripe payment gateway, validating transactions, payments, checkout flows, adjustments, and rewards
- Tested end-to-end payment flows including refunds, voids, and transaction integrity using Stripe API
- Utilized Postman for API validation and MySQL for database verification ensuring payment processing accuracy
- Leveraged AWS environments for backend validation and log analysis ensuring smooth payment gateway integration
- Documented bugs with detailed repro steps, environment details, and evidence for developer review

### Senior QA Engineer & QA Engineer Roles

*Proximity | Experian | Fiserv IT | Bosz Digital | Avventa/CitiBank | 2011 - 2021*

*Skills: GitHub Actions, Postman, MySQL, JIRA, iOS/Android, Agile/Scrum, Manual Testing*

- Executed manual testing across healthcare, financial, insurance, and marketing platforms (web and mobile)
- Performed functional, integration, smoke, regression, and release validation testing in Agile/Scrum environments
- Integrated automated tests with GitHub Actions CI/CD pipeline, ensuring test execution was triggered automatically on code pushes and validating builds before deployment
- Conducted mobile testing across iOS and Android platforms ensuring cross-device compatibility and functionality
- Collaborated with product and engineering teams to improve quality coverage and delivery outcomes
- Validated backend logic using MySQL and API behavior via Postman for financial and healthcare applications

## EDUCATION

- Systems Engineering (In Progress) — Universidad Latina
- High School Diploma — Jesús de Nazareth Bilingual High School

## LANGUAGES

- **Spanish:** Native | **English:** C1+ Advanced/Professional
